# EXHIBIT "D" - COMPREHENSIVE PLAN, TOWN OF CARLTON LANDING 

EUFAULA LAKE, OKLAHOMA

urban standards
The Urban Standards are a matrix of text and diagrams that regulate those aspects of private buildings which affect
the public realm. The Urban Standards vary according to the zoning categoes of the transect. These categories are allocated on the Regulating Plan. The Bulding Types Summary defines the Building Types, there is detalle. formation about buildings such as lot ize, setbacks, encroachments and buildgheight. The Street Frontage stanancourage the provision streetscape, encourage the provision of certain
building types and frontage elements which influence social behavior.

DEFINITIONS
Outbuilding: A building located on a lot, Which it shares with a primary building. front drive.
Lot Line: The boundary that legally and geometrically demarcates a lot
rontage Line: The line between a prirate lot and a primary
thoroughfare or civic space
Frontage: The privately held piece of and between the Facade of a building and the Frontage Line.
Elevation: An exterior wall of a building. ing that face a Frontage Line. Facades shall generally be built parallel to the principal frontage line
building sits on its site. B be generally disposed in relation to the boundaries of their lots as specified in the building type diagrams. Setbacks, frontage types and building heights shall all comply with these diagrams $s$ well.
Pimary Structure: The main building on a lot, usually located toward the fontage. The volume of the primary tructure is defined by the length multiplied by the width multiplied by the roof line of the entire primary structure above grade. Subordinate building wings to the primary structure and pen porches will not be calculated in the volume
Setback:
maximum distance between a frontage line and a facade, or the distance be porches, balconies, overhangs and ramps are usually exempt from setback requirements.
Front Setback: The distance between a frontage line and a facade. This
distance is given as a minimum or as requirement. Open porches, balconies, stoops, chimneys and bay windows ar premitted to setback.
the side lot line a building with the exception of roof over hangs. This distance is given as a minito encroach on the side setback, excep in the case of sideyard houses. Rear Setback: The distance between the rear lot line and any portion of a
principal building. This distance is given as a minimum. Outbuildings are permit ted to encroach on the rear setback in lieu of any utility easement. Encroachment: Any portion of the stoop) that projects into the setback line.

ALLOWED USES
For Town Center, Neighborhood Center, Neighborhood General, and Neighborhood Edge, permitted uses are includ

URBAN PROVISIONS
Principal Building and Yard
stoops, balconies, porches, and bay corner lot side setback

- Double frontage buldings shall have the required front setback along both frontages unless otherwise designated Buildings shang Plan
or 6 projecting corners to fhan 2 , - Front loaded garage doors shall be recessed from the primary building facade a minimum of 20 feet
Attached buildings on corner lots may ward a maximum of 6 feet
- Fences, garden walls, and hedges may be built on property lines or as a conPrincipal Building Height
- Height shall be measured from grade

## elevation 39 feet.

- Residential ground floors shall have a minimum height of 9 feet. Commercial
ground floors shall have a minimum height of 12 feet.
- Structures such as, but not limited to, Observation Towers shall be allowed to
reach an accessible height of 60 feet if all of the following conditions are met: 1. Structure is constructed on other
than residential lot. than residential lot.

2. Structure has a footprint of 250
square feet or less. 3. Structure is uninhabitable.
3. Structure meets conditions for con-
struction stated by local building codes struction stated by local building codes
and local fire officials. and local fire officials,
tural features shall be allowed to reach a height of 100 feet from finished grade.
Outbuilding

- An outbuilding shall have a maximum of 625 habitable square feet with the exception of those on estate lots. - Maximum outbuilding height shall be 22 feet measured to the eave with
exception of those on estate lots. - Outbuildings with the narrowest end of the primary mass greater than 18 feet may not have a principal rafter
bearing height higher than the eave of bearing height higher than the eave of
the principal building. This note takes precedent over typical maximum building height
- Lodging and home occupational uses
are permitted within an outbuilding if are activity is pursued by the propling erty owner and the property owner is in residence in the primary dwelling Accessory units cannot be rented
- Only one habitable accessory struc per residential lot

## Parking

- Parking shall be 2 spaces per principle dwelling unit; 1 per apartment unit; and 1 per every
- Required parking shall include on-stree parking along the frontage.
- Front loaded driveways are permitted
on lots with widths of 50 feet or greater.

## NEIGHBORHOOD CENTER - T4

Dwelling Assembly System
The advantages of this system are the number of modules which can be used in unlimited combinations, while keeping efficiency of production and reasonable budget. The wings can be combined and located on different sizes of lots creating a great variety of elevations and layouts, but keeping the elements constant. This gives the buyer of stories, and sizes of living and dining space, as of stories, and sizes of living and dining space, as well as the additional choices of diverse spaces
like gardens, covered entries, foyers and terraces. The Dwelling Assembly Matrix is also environmentally responsible because the disposition of the modules on the lot, sunlight control, cross ventilation, roof configuration, and choice of materials can all be adjusted to respond to the environment.
